

How to determine your Bangle Size?

1. Take a Bangle that fits you perfectly.
2. Place a ruler horizontally across its centre and note the reading where the two ends of the inner circle touch the ruler, to get the exact measurement of the diameter in inches.
3. Look up the 1st Ruler measurement (from inches 2 to 3) to identify the decimal points (eg. 2.5, 2.6, 2.7etc) of your bangle size.
